

We love Video Relay System. It is great effective communication. We are very happy with it. We can communicate with our hearing families, friends, business, employment and services. Hearing people love Video Relay System. It is a free barrier communication on telephone system! Please don't cut or reduce or limit Video Relay System Program. Our Deaf and Hard of Hearing people still want free communication with hearing people in our nation! Do not let us darkness communication in the world! Video Relay System is important for everyone!

Thank you,

Vernon & Jo Ellen Bonse
